EDUCATION

Bachelor of Science in Software Engineering

Brigham Young University - Idaho

December 2025

Rexburg, Idaho

RELEVANT WORK EXPERIENCE

IT Technician

Miles Willard Technologies

January 2026 - Present

Idaho Falls, Idaho

- Provide technical support for hardware, software, and network related issues
- Perform system updates, software installation, and manage backups of company data
- Respond to IT support requests, diagnosing issues, and implementing timely solutions for end users

PowerSchool Developer Intern

Sugar Salem Information Technology

August 2025 - November 2025

Sugar City, Idaho

- Developed a self-service kiosk application integrating the NinjaOne MSP with PowerSchool to automate ticket filing for students and IT staff
- Designed and implemented a receipt-generation system that printed time-stamped visit confirmations containing a timestamp, student information, and support request details - enabling teachers to verify IT office visits with students
- Engineered a PowerSchool plugin to facilitate REST API access, supporting real-time student data integration between PowerSchool and school IT systems

TECHNICAL SKILLS

- Programming Languages: C#, Python, JavaScript, SQL
- OAUTH 2.0: Authentication & Authorization workflows
- APIs: REST API Integration, data handling, and secure API key management
- PowerSchool: Plugin development, PowerQuery API access
- Cloud & Virtualization: Cloud VM operation, virtual machine provisioning and management

ACHIEVEMENTS

- BSA Eagle Scout - Grand Teton Council

VOLUNTEER EXPERIENCE

Sugar Salem High School Information Technology Department

Sugar City, Idaho

Singlewire InformaCast Administration

August 2024 - September 2024

- Created and managed emergency notification scenarios and workflows for incidents such as lockdown, evacuation, and severe weather events
- Configured optimal settings for speaker and PA head systems
- Collaborated with school administration to configure and maintain automated bell schedules
